F7 Continuous Vacuum Filler

The Omet F7 Vacuum filler is a highly competitive product available with portioner & twist linker OR with portioner, twist linker & hydraulic loader compatible with 90ltr buggies.

The high manufacturing precision of mechanical parts within the pump set (with 8 or 12 vanes) in high resistance steel guarantees a delicate treatment of any product & maximum longevity.

A standard asynchronous motor controlled by an inverter & an extremely simple control panel, programmable with a 10" touch screen control, make this machine simple to use, reliable and easy to maintain.

The joined effect of the 20m³ vacuum pump and the auger and the counter-auger in the hopper assures compact and air free products even with hard and low temperature raw materials.

Possibility to install and subsequently purchase hydraulic loader for 90Ltrs and a hopper of 90 or 160 Litres.

Additionally accident prevention protections are assured by sensors controlled by a high safety electronic central unit.

Technical data	
Hopper Capacity	90 or 160 litres
Main Motor	1.5 kw
Vacuum pump motor	0.75kw
Loader Motor	0.75kw
Max Production	2300kg per hour
Portioning range	5-10,000 grams
Portioning Speed	150n/min
Weight	450kgs
Weight with loader	610kgs
